To whom it may concern,

I am writing to express my interest in the position of Front End React Developer at Silver Gold Bull Inc in Calgary, AB. I was pleased to find the vacancy on indeed.com because I am convinced that my software-developing skills and my ability to work in fast-paced environments can help provide technical solutions to the software platforms adopted by Silver Gold Bull Inc.

To shortly introduce myself, my name is Samuel Chen. I am a new grad mechanical engineer; I have a passion for learning new technologies and am driven to become a software developer and have had full-stack web development experience in the form of freelancing. I have proven my ability to self-learn, manage time, and problem-solve by self-learning and becoming proficient in modern web technologies, including HTML5, CSS3, JavaScript, React, Node.js, and MySQL. Although most of my software development experience is with web technologies, my ability to learn quickly coupled with my desire to become an excellent programmer gives me confidence that I can learn any technologies necessary to work at Silver Gold Bull Inc.

During my 2 years of experience as a full stack web developer, I have built a database and management web application for a local Badminton center where I utilized modern web technologies like React, Nodejs, Express Frameworks, MySQL, and Git. I implemented practical design patterns like service-controller-routes, when building the RESTful API and have become proficient with AWS cloud computing tools like Lambda, Amplify, and Gateway. This application has become the center's primary mode of tracking customer orders and has helped reclaim over \$10 000 in unpaid fees.

I hope my discipline, drive, and time management in self-teaching myself modern web technologies after graduating from mechanical engineering showcases my passion for software development. My proven ability to learn quickly, problem-solve, and critically think, makes me an excellent candidate to develop as I am confident, I can contribute to revenue-generating software. For any questions, you can contact me via phone number at 403-389-6509 or email at sam_chen4@outlook.com. Thank you for your time and consideration.

Sincerely,

Samuel Chen
